

## **Strengthening imaging research in Europe**

# Membership Levels and Examples of the Benefits

**Platinum** (Euro 8.000 pa)

## Support and information

- Information on technological status of Euro-Biolmaging Nodes
- Access to tailored usage data and statistics
- Information on Euro-Biolmaging training programs
- Individually tailor proposals on useful activities and interactions with Euro-Biolmaging community
- Representation of industrial activities and opinions to national and EU political community
- Participation in common lobbying activities e.g. at the national and European level (Brussels)
- Reports from the users, information on potentially useful samples, success and satisfaction rate
- Personal support of industry users of Euro-Biolmaging services

## Marketing

- Appearance in promotional public Industry Board material
- Company logo and advertising material at Euro-Biolmaging events
- Company logo on Euro-Biolmaging website

## Meetings

- Participation in Industry Board meetings
- Personal invitation to Euro-Biolmaging stakeholders' meetings

**Gold** (Euro 4.000 pa)

## Support and information

- Information on technological status of Euro-Biolmaging Nodes
- Personal support of industry users of Euro-Biolmaging services
- Information on Euro-Biolmaging training programs
- Representation of industrial activities and opinions to national and EU political community

## Marketing

- Company logo on Euro-Biolmaging website
- Appearance in promotional public Industry Board material

## Meetings

- Participation in Industry Board meetings
- Personal invitation to Euro-Biolmaging stakeholders' meetings

**Silver** (Euro 2.000 pa)

### Support and information

- Information on Euro-Biolmaging training programs

### Marketing

- Company logo on Euro-Biolmaging website
- Appearance in promotional public Industry Board material

### Meetings

- Participation in Industry Board meetings
- Personal invitation to Euro-Biolmaging stakeholders' meetings

## Board Members

We make it visible.

## Goals of the Euro-Bioimaging Industry Board

- Strengthen communication with imaging technology Users and imaging facilities, enabling timely understanding of Users' needs
- Stay up-to-date with use of technology and software at Euro-Bioimaging Nodes and needs of researchers
- Participate in Euro-Bioimaging training activities
- Cooperate with Euro-Bioimaging Nodes on the development and testing of novel technologies
- Create a platform for industry-science cross collaboration
- Participate in "One Voice" activities to the political community at the national and European level in order to increase the bioimaging market

## What is Euro-Bioimaging?

Euro-Bioimaging is the pan-European Research Infrastructure for Imaging Technologies in Biological and Biomedical Science. It is an open access resource for all life scientists providing:

- Access to biological and biomedical imaging technologies in Europe
- Image data repositories and analysis tools
- Training opportunities in imaging

The Euro-Bioimaging Industry Board is the bridge between imaging industry, researchers and imaging facilities. Close relationship with Euro-Bioimaging is opening the door to up-to-date information about current trends in imaging technologies, organisation of joint training programs and common lobbying activities.
